PERSONAL STATEMENT

I am a dedicated Information Technology (IT) Manager with over 15 years of professional experience in the field. Over the course of my career, I've had the privilege of managing a diverse range of IT projects, from system upgrades to complex network infrastructure designs.

In addition to my managerial skills, I am also a skilled programmer adept in several languages, including C#, VB.net, and PHP. I've enjoyed using my technical knowledge to guide my teams to successfully execute projects and continuously improve systems. I view code not merely as lines on a screen, but as a powerful tool for problem-solving, enhancing efficiency, and driving innovation.
